ProjectWise – Opening/Creating Documents v **CADD** Support **Microstation**

You should notice two differences on your desktop after the ProjectWise Migration is complete

- There is an icon for ProjectWise •
- Your Microstation icon is no longer

ProjectWise Explorer is the preferred way to open any project related file.

If you are opening a file in Microstation, simply open up ProjectWise Explorer.

- Navigate to your file
- Double click on it or right click •
- Choose Open •
 - This will open it in Microstation with ProjectWise linked for other file operations.

ProjectWise – Opening/Creating Documents v Microstation

How to create a new file in ProjectWise

- Click on Document
- New Document

Again the ProjectWise Document Creation Wizard will pop up

After the wizard fill out the Create Document by entering the below information

- Filename
- Description
- Set the Application to Microstation

In the File section

Microstation

CADD Support

- Click on the Advanced tab
- Choose Import
 - This will allow you to pick your Seed File

Wa	rkSpace		Components	S	patial

File name:		✓ All files (*.*)	
			Canad

In the Synchronize Names dialog

• Choose Use original document name to keep the file name you gave it • Use new file name changes your file name to the seed file name

This document's name and file name r	nust be the same.
Select which name will be used to pop	ulate both
property fields.	
Use original document name	
🔾 Use new file name	

Click Save •

The new file is added to ProjectWise

Opening a File from Microstation

When you want to Open another file, it takes you to the last project folder you were in in ProjectWise

Again, Cancel takes you to your local hard drive
