

At the new VDOT Homepage webpage, to go directly to the Construction Division:

1. Select Doing business.
2. Click on the + sign and select Highway Contracts

The screenshot displays the VDOT website interface. At the top, the header includes the VDOT logo, the text "Virginia Department of Transportation", and "An official website of the Commonwealth of Virginia". Navigation links for "ABOUT", "CAREERS", and "CONTACT" are visible. A secondary navigation bar contains "Travel and traffic", "News and events", "Projects", and "Doing business" (which is circled in red). Below this, a dropdown menu is open, listing "Business opportunities" (circled in red), "Consultants", "Alternative project delivery", "Goods and services", "Highway contractors" (circled in red), "Technical guidance and support", "Programs for businesses", and "Tools". On the main page, the breadcrumb trail reads "Home / Doing business / Business opportunities / Highway contractors". The main heading is "Highway contractors" (circled in red), with a sub-heading "Information on how contractors can become prequalified, view advertised contracts". A section titled "Advertisement and bidding" is partially visible at the bottom.

At the Highway contractors page, you can view the Prequalification information page.

To the top-right you can gain access to the Advertisements and Bidding and Letting information:

Home / Doing business / Business opportunities / Highway contractors

Highway contractors

Information on how contractors can become prequalified, view advertised contracts and compete by bidding.

Advertisement and bidding process

Construction and maintenance advertisements are posted online and mailed to all pre-qualified vendors each month. Contractors then have chance to bid.

[Advertisements](#)

[Bidding and letting](#)

For reference information select Doing business

Click on the + sign of the technical guidance and support option

Then click on Construction

Reference Page:

Construction

The Construction Division delivers a quality transportation system by advertising and executing contracts to build and maintain the state highway system, providing professional construction management, program oversight, and training.

Programs and processes

Construction Engineering and Inspection Services

The program provides statewide access to skilled engineering and inspection consultants to support VDOT construction projects.

Value engineering

VDOT uses value engineering, a systematic, creative study process conducted by engineers and technicians to obtain optimum value for every dollar spent.

Construction Quality Improvement Program

CQIP randomly reviews active construction projects across the commonwealth for compliance with applicable law, contract, plans, and department policy and procedures.
